

Education

Priyadarshini J L College of Engineering, Nagpur
B.Tech – Computer Science & Engineering Dec 2021 – June 2025

CGPA – 7.44

Skills

- **Programming language:** C, Java, JavaScript
- **Programming Paradigms:** OOPs, Data Structures & Algorithms (DSA), Problem Solving
- **Databases:** MySQL, SQL, MongoDB
- **Operating Systems:** Windows, Linux
- **Development Tools:** VS Code, Eclipse, Postman, IntelliJ IDE
- **Version Control:** Git, GitHub, Replit
- **Web Development:** HTML, CSS, JavaScript, Bootstrap, DOM, JSON
- **Full Stack Technologies:** MongoDB, Express.js, React.js, Node.js (MERN Stack)

Certification

- Training of **Java Full Stack Developer**-SSPU Pune, Maharashtra (2024)-(Duration-3 Months)
- Active Participation in 24-hours **National Level Techathon 2024** (AISMS Innovations Foundation Pune, Maharashtra)
- **Digital IT** Computer Course (2021)–91% (Duration-12Months)
- **TallyErp-9** (2020) - 95% (Duration-6Months)

Strength

- Strong Logical & Analytical Thinking
- Passion for Building Real World Application
- Good Team Worker & Ability to work under pressure
- Very passionate about Presentation
- Quick Learner & Creative

Tanisha Suresh Gokhale

Full Stack Developer

I am a motivated Full-Stack Developer dedicated to building efficient, scalable, and user-friendly web applications. I possess strong skills in both front-end and back-end development, enabling me to deliver comprehensive software solutions. I focus on seamless integration between the UI, server, and database layers while writing clean, optimized code to enhance overall application performance. I am eager to contribute to a dynamic development team and grow as a software professional.

Training

MERN Stack Developer

Institute: Itpreneur Institute, Nagpur

Duration: Jan 2025 – Present

- Completed hands-on training in the MERN Stack: MongoDB, Express.js, React.js, and Node.js.
- Built multiple full-stack applications following MVC architecture, using Promises, async/await, and RESTful routing.
- Developed a Restaurant Website with complete CRUD operations using JavaScript and Local Storage.
- Implemented Login and Signup functionality using browser-based data storage.
- Cloned a website and built a custom Admin Dashboard for content management using JSON and CRUD operations.
- Developed e-commerce-style applications using React (frontend) and Node.js + Express.js (backend), including product listing, filtering, API handling, and CRUD functionality.

Project

E-Commerce Website – TG-Shoppers

Technologies: MongoDB, Express.js, React.js, Node.js

- Developed a full-stack E-commerce web application using MERN Stack following MVC architecture.
- Implemented user authentication and authorization with secure login functionality.
- Created multiple product categories with dynamic routing.
- Designed a separate Admin Dashboard for managing products.
- Implemented CRUD operations (Create, Read, Update, Delete) for products in the admin panel.
- Added Add to Cart functionality with product quantity management.
- Implemented sorting and filtering features for improved user experience.
- Used React Router for client-side routing.
- Handled API calls using Promises and async/await.
- Integrated frontend and backend using RESTful APIs.

Nova-Polis-X – Service-Based Web Application for Nagpur City

Technologies: React.js, Node.js, Express.js, MongoDB, REST APIs

- Developed a full-stack service-based web application providing a centralized platform for accessing services and information related to Nagpur city.
- Built a responsive and user-friendly frontend using React.js with component-based architecture.
- Implemented backend services using Node.js and Express.js to handle business logic and API requests.
- Designed and maintained a MongoDB database for efficient data storage and management.
- Ensured seamless communication between frontend and backend through RESTful APIs.
